

CEE NORM

Movable Plug

With Screw Terminal

CODE:1467.416.15

## TECHNICAL DETAILS

|                                  |                                                     |
|----------------------------------|-----------------------------------------------------|
| Product Group:                   | Horizontal Panel Mounting Sockets with Locked Cover |
| Amperage:                        | 16 A                                                |
| Poles:                           | 3P+T                                                |
| Earth Position:                  | 6 h                                                 |
| Voltage:                         | 380- 415 V                                          |
| Frequency:                       | 50 and 60 Hz                                        |
| Protection:                      | IP 67                                               |
| Color Code:                      | Red RAL 3020                                        |
| Connection:                      | Screw Terminal                                      |
| Max. Conductor:                  | 6,0 mm <sup>2</sup>                                 |
| Material Housing:                | Polyamide                                           |
| Material Contact:                | MS 58 Brass                                         |
| Contact Holder Plastic Material: | Polyamide                                           |
| Weight/pcs:                      | 505 gr.                                             |
| Packaging Box:                   | 1 pcs                                               |
